

### DATASHEET: PC20 Green Masking Tape 204°C

#### DESCRIPTION:

This powder coating masking tape is designed for clean, reliable performance.

Excellent strength and tack.

It offers fine line definition without bleeding, clean removal with no adhesive residue, and temperature resistance up to 218°C.

#### TECHNICAL INFO:

#### VALUE

Backing	Polyester
Adhesive	Crosslinked Silicone
Backing Thickness	1 mil
Adhesive Thickness	1.5 mil
Total Thickness	2.5 mil
Breaking Strength	6.3 kg/cm
Elongation	130%
Adhesion to Steel	0.45 kg/cm
Dielectric Strength	5400 Volts
Temperature Range	-51 to 218°C

#### HANGON ADVISE:

A very thin tape, excellent for masking a contour.

Used in the powder coat industry.

#### BONDING INFORMATION:

For maximum adhesion, bonding surfaces should be clean, dry and free from grease and oils.

The firmer the applications pressure and the greater the contact area, the stronger the bond.

Bond strengths will increase as a function of time as the adhesive continues to wet out the bonding surfaces.

Ultimate adhesion can be obtained immediately by the application of heat ( adhesive line = 93°C ) and pressure.
