

DATASHEET: PT5MIL Thick Polyester Tape 204°C

DESCRIPTION:

The PT5MIL is the replacement for the PT6MIL.
A very thick polyester based tape, for the powder coating industry.

TECHNICAL INFO:

VALUE

| | |
|------------------------|----------------|
| Temperature Resistance | 218°C |
| Backing Thickness | 25 Microns |
| Backing | Polyester Film |
| Adhesive Thickness | 38 Microns |
| Adhesive | Silicone |
| Colour | Green |
| Total Thickness | 63 Microns |
| Breaking Strength | 6.3 kg/cm |
| Elongation | 130% |
| Adhesion to Steel | 0.45 kg/cm |
| Dielectric Strength | 6500 Volts |

HANGON ADVISE:

This tape is used when thick layers of powdercoat are required.
The tape is very acid resistant.
